Virginland's Dual-Purpose Security Tag

ET-L084

Better inventory control

With RFID technology, thousands of tags can be scanned in seconds reducing the operational time to a great extent. It does not have any line-of-sight limitations. RFID systems can automatically pick up tag IDs from a distance and, in some cases, through obstacles between the tag and the reader. This makes the process fast and reliable.

Cost-saving

Although RFID technology is still typically expensive to set up and use, RFID systems bring their own cost benefits, such as reduced labor costs, improved efficiency and minimize human errors. It provides better control and visibility at each step of the supply chain.

KEY FEATURES

- EAS and RFID combination
- Strong and impact resistant
- Sales, warehouse and logistics management
- Durable and reusable
- Data Security

SPECIFICATIONS

- Size: 79.52 x 32.43 X 20.64 mm
- Weight: 12.80g/pc
- Packing detail: 585 X 390 X 160mm 500pcs/ctn
- GW: 8.00kgs/ctn
