

TrustTag's candle anti-theft tag has a simple structure and can be locked and unlocked by one-handed operation. The method of use is to put the anti-theft label in the glass bottle. After the lock is locked, the anti-theft label cannot be taken out. You must use a professional magnetic unlocker to open the lock before taking it out. If the thief directly takes the candle glass bottle with the anti-theft label out of the store, the entrance guard of the store's anti-theft system will call the police, thus successfully realizing the anti-theft function.

KEY FEATURES

- Simple structure, strong anti-theft function
