# Virginland's Delayed Alarming Ink Cable Lock

To prevent grab and run theft in retail stores, TrustTag has developed a super strong anti-theft ink tag with triple alarm function.

When the tag passes through the security gate system both will the tag and gate system will alarm. The tag will continuously alarm for 2 minutes and flash a red light. Then the red light flashes and beeps once every 5 seconds. After another 3 minutes, the tag's motor will start to cut the ink pack, allowing the ink to flow out and dye it on the stolen item.

After the ink is blasted, the product will be stained, so that the thief can no longer use or re-sell it.

## KEY FEATURES

- 3 alarm function, AM 58Khz requency
- Ink blasting function
- Cable length can be customized
- Easy to use and recycle
- Tag color and lock length can be customized

Product Code	Description	Dimension(mm)	Weight(g)
ET-E014	DELAYED ALARMING INK CABLE LOCK	65 X 49 X 24	22.9g/pc
